

ブロック ブロック

# BLOCK.BLOCK

BLOCK.BLOCK -ブロック.ブロック-

PLAYERS 2人 TIME 10min AGE 7+

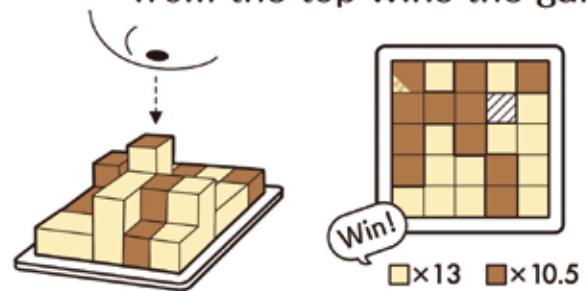

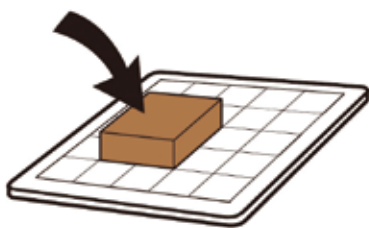

Components

- Game Board x 1
- Blocks [Brown] x 11
- [White] x 10

There is an extra 1x1x1 block for brown.

## How to Play

- Place the game board and decide who plays first. The first player takes all the brown blocks at hand, and the other player does the same for all the white blocks.
- In turn, put the blocks one by one... →
- The player with more areas looked from the top wins the game.

- The extra block must be placed at the very end of the game. It is counted as 0.5 points for scoring.

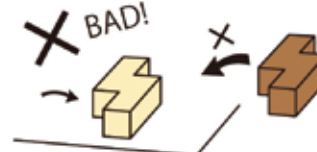

## Rules for Block Placement

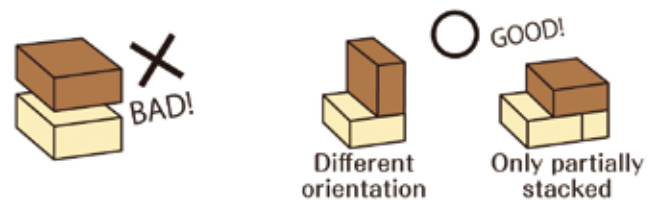

Blocks cannot have any empty space underneath.

A player cannot put the block of the same shape that the other player has just placed. (The same-shaped block can be played only if there is no other placable block.)

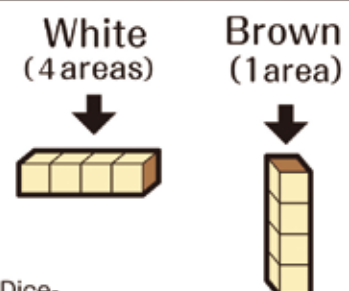

Blocks of the same shape cannot be stacked in the same orientation.

If no more spot is left to place any block, the player immediately loses the game.

For both colors, the 1x1x3 and 1x1x4 blocks have the opponent's color at both ends. Each end is counted as that color's point when it is visible from the top in the scoring phase.
